

Text Display Versions

Speed Display with LED-Texts

- One or two LED text lines possible depending on the model with up to three colors.
- Any letters in the text line possible
- Any Speed thresholds adjustable
- (optional) own user account
Different flash modes possible

One text line can be assembled with up to three different colors of LED's. Texts can be shown in different colors (e.g. Red: "Slow down" ; Green: "Thank you")
Another option is to assemble the display with a multifunctional matrix in order to show different texts with the same color.
